1 Preliminary Remarks & Reading Aid

In this codebook all 8 data files from the NEPScomp (Version 2.0.0, Onsite; doi:10.5157/NEPScomp:SUF:2.0.0) **of Starting Cohort 4** with a total of 5499 variables are documented. Each chapter starts with an overwiew of all variables in a file – in the order of their appearance in the file. The variable names are linked to the information on the respective variable.

This information – if available – is presented:

1. question (bold), partly with different wording alternatives with the corresponding conditions and clickable question numbers; closer definition of the question after delimiter ▹
2. variable name (as in data file)
3. variable label from data file
4. reference to the questionnaire (as described in the data manual)
5. question number in instrument after a colon
6. interview instructions inside «…»
7. table with frequencies
    a) column 1: value label
    b) column 2: value
    c) column 3: absolute frequencies (#)
    d) column 4-…: absolute frequencies by wave (if possible)
    e) missing values at the end of table and slanted

The length of the table has been technically limited; where required the number of removed lines is reported.

«Fachhochschulreife (FHR): entitles to study at a university of applied sciences (FH); subject-related FHR: entitlement to study at a university of applied sciences limited to certain fields of study; school-based part of the FHR - full FHR: the 'full' FHR consists of a school-based part and a previous practical education. The school-based part can generally be acquired after completion of the 12th grade at a higher secondary school. It is only possible to start studying at a university of applied sciences together with the previous practical education part.»

This means that a special needs teacher has assessed your child's learning capabilities.** «If there are any questions about what special needs teachers are: These are teachers who have been trained to offer particular support to students who have learning disabilities, hearing disorders, behavioral problems, speech impediments, or who are visually impaired or physically disabled. What do you think the market value of all these assets in your household would be if you were to sell them today? Please do not deduct any debt. «In case of problems with accuracy: 'Please give a rough estimate of the amount'. Refer to the fact that any response given will be anonymous. In case of general uncertainty about the question: 'This means the current value of all of the types of assets of the entire household listed above if you were to sell them today.' In case something is unclear regarding sales/market value for people whose household only has a savings book/checking account: 'Please add up the current amounts on all savings books and in all checking accounts.' In case something is unclear regarding sales/market value for persons whose household has various asset components: 'This means the current value of all of the types of assets of the entire household listed above if you were to sell them today, plus the sum of all the amounts on all the savings books and in all the checking accounts of the entire household.'»

Most children in our study are enrolled in school. What about <name of target child>? Is <name of target child> already enrolled in school? «Another possible term for elementary school is primary school. In case of questions: Enrollment refers to the admission of the child in the school, meaning the child goes to school. Attending a preschool is considered school preparation and is not meant here.»

What grade is <name of target child> attending currently? «Some schools have school entrance stages or phases. Here, students are taught in classes with mixed grades, usually the first and second grade together, rather than in grade-specific classes. Sometimes there is even a flexible school attendance period of up to three years. Parents can therefore not always specify the class. Grade is synonymous with school year.»

What is your highest general education school-leaving certificate? «Read the options aloud only if necessary and have them assigned. If Fachabitur is specified, please ask whether this qualifies the respondent for admission to studies at a university of applied sciences or at a university. If university of applied sciences is specified, assign to category 4, if university is specified, assign to category 5. For qualifications acquired abroad, categorize them as follows: What would be the equivalent qualification in Germany?»

t261908 Volunteer participation

There are many ways to get involved in society outside of work and family. Please think of activities that you perform on a voluntary basis or other social commitment, for example in associations, initiatives, projects or self-help groups. We are talking about voluntary tasks and work that you do unpaid or for a small expense allowance. Thinking about the last 12 months: Have you been socially involved or volunteered? ««It is !!not!! about simple free time activities in clubs and organized groups, but about regular voluntary work. Read aloud if necessary (in case TP is irritated because the question does not fit because of corona): We are aware that there were many restrictions due to the corona pandemic last year. However, for scientific reasons it is important that we ask the same questions every year. Only then can we compare results and see changes over time.»»

t261909 Number volunteer activities (open)

There are many different types of volunteer activities. They can range from coaching in a sports club to serving drinks at an event. We are interested in whether you have volunteered for one or more activities and jobs, for example, within a club or organized group. How many volunteer activities have you participated in over the past 12 months so far? ««If the target person participates in more than one activity within a club or organized group: e.g. coaching activities in a sports club and additionally serving drinks at events of the same sports club, please enter the number '2'. The target person can enter as many different activities as he or she wishes. Detailed information is then only available for the three most important activities. Read aloud if necessary (in case the target person is irritated because the question does not fit because of corona): We are aware that there were many restrictions due to the corona pandemic last year. However, for scientific reasons it is important that we ask the same questions every year. Only then can we compare results and see changes over time.»»

First of all, we would like to ask you if you are currently attending a school that will lead to a general school-leaving qualification? By this we mean, e.g., a school-leaving qualification from a Hauptschule, school-leaving qualification from a Realschule or Abitur (higher education entrance qualification). th60005 Digitalization: external control

In my job, I feel increasingly controlled by networked digital technologies. ««Read the options aloud if necessary. Some examples of networked digital technologies are online platforms, e-mail, tablets, cloud services and self-controlling or self-learning computer systems.»»

th60007 Automatization: occupational characteristic

So far, our questions about digitalization have mainly concerned the use of networked digital technologies. But we are also interested in another aspect: !!the automatization of work processes!! By this we mean the use of computer systems that determine, evaluate or optimize work processes mostly independently by making their own decisions. What about your work? To what extent are the work processes at !!your workplace!! automatized?
