What do you think the market value of all these assets in your household would be if you were to sell them today? Please do not deduct any debt. «In case of problems with accuracy: 'Please give a rough estimate of the amount'. Refer to the fact that any response given will be anonymous. In case of general uncertainty about the question: 'This means the current value of all of the types of assets of the entire household listed above if you were to sell them today.' In case something is unclear regarding sales/market value for people whose household only has a savings book/checking account: 'Please add up the current amounts on all savings books and in all checking accounts.' In case something is unclear regarding sales/market value for persons whose household has various asset components: 'This means the current value of all of the types of assets of the entire household listed above if you were to sell them today, plus the sum of all the amounts on all the savings books and in all the checking accounts of the entire household.'»

t31064a Idealistic aspiration further qualification

So far we have talked about courses and training courses. But in order to advance professionally, you can also acquire a further school-leaving qualification or do a vocational qualification, for example, the school-leaving certificate of a Realschule, the Abitur, vocational training, the master craftsman/craftswoman training or a course of study. If it was up to you, regardless of your professional and private obligations: Would you like to acquire an additional qualification in order to advance professionally? «In case of questions: this also includes a school-leaving certificate of a Hauptschule, a technician training, attendance of a Fachschule, vocational school, university of applied sciences or a doctorate.»

First of all, we would like to ask you if you are currently attending a school that will lead to a general school-leaving qualification? By this we mean, e.g., a school-leaving qualification from a Hauptschule, school-leaving qualification from a Realschule or Abitur (higher education entrance qualification). We !!don't!! mean vocational schools that you attended in the course of vocational training or vocational preparation measures here. «Do not read the options aloud.»

p421000 Number Visits in country of origin

***[ATTENTION: There are several question formulations for this variable – see the Variable Search or Survey Instruments for detailed information!]* In the last survey you told us about your country of origin. We have a few more questions about this.** «If both countries have been visited equally, record the number for one of the countries. If this is unclear, please ask again. Please do not read the options aloud, just allocate the answer. If this is unclear, please ask again. If the respondent is not sure, please clarify: 'By country of origin, I mean the country where you or your parents were born.' If the respondent disagrees: Please use the button and say: I am sorry. We must have recorded that incorrectly during our last telephone conversation. Let's go on with the other questions.'»

th60007 Automatization: occupational characteristic

So far, our questions about digitalization have mainly concerned the use of networked digital technologies. But we are also interested in another aspect: !!the automatization of work processes!! By this we mean the use of computer systems that determine, evaluate or optimize work processes mostly independently by making their own decisions. What about your work? To what extent are the work processes at !!your workplace!! automatized?

th60008 Digitalization: job loss

We are now interested in your assessment of the consequences of digitalization. How much has this development changed the risk of losing your current job? Does the risk increase strongly, increase slightly, stay about the same, decrease slightly or decrease strongly?

th60009 Digitalization: labor market opportunities

And if you don’t think of your current job, but of !!your!! skills and chances in the labor market in general: How do you assess your chances of finding a new job in a labor market changed by digitalization? Would your chances improve strongly, improve, stay the same, worsen or worsen strongly?
