1 Overview and Reading Aid

The documents in this section are based on the field versions but are extended by including the variable names and values. The variable names used in this generated document of the CAPI questionnaire for parents can be found in the data files, as well. The field versions can be found in the corresponding column "Startkohorte 1: Neugeborene (SC1), Welle 1, Erhebungsinstrumente (Feldversion)" (only available in German). We recommend using the provided SUF versions over the field versions when working with the data. This manual covers the survey year of 2012/13 and features data wave 1. The material corresponds to Version 1.0.0 of the Scientific Use File (SUF) for the Starting Cohort 1 (SC1) (doi:10.5157/NEPS:SC1:1.0.0). Figure 1 describes the possible components of the documented survey.

Figure 1: Reading aid for survey tools

If available, this information includes the following:

1. Questions (bold): Text, which is a) handed out in the form of PAPI or online surveys and b) read out during CATI or CAPI surveys by an interviewer (sometimes with variations depending on specific conditions).

2. Question numbers in the survey tool (bold)

3. Instructions (italic, shaded in yellow) are considered as a) guidelines for PAPI or online surveys and b) instructions for the interviewer for CATI or CAPI surveys, in order to ask the questions in a correct way and react appropriately to inquiries. These are not read out by the interviewer.

4. Values labels

5. Missing values (italic)

6. Output filters (italic)

7. Automatic values (italic): Under certain conditions, these are necessary, e.g. when coding auxiliary variables.

8. Variables

   a) Variable name in SUF-data set (variable names indicated in brackets are not part of the SUF)

   b) Variable label: This is a short form of the description of the item.

   c) Data set, in which the variable(s) can be found.

Figure 2: Survey of Starting Cohort 1 and ID of the CAPI-instrument in wave 1

Figure 2 gives an overview of the field time for the first main survey. The survey was conducted via computer assisted interviews (CAPI) with the mothers (parents) taken place from August 2012 to March 2013. Additionally, direct measures of the children were assesed.

300402 Now you can play with your child for a little while – first of all with <target child's name>'s own toys or everyday objects that he / she likes to play with. After three minutes, I'll put your things to the side and give you the toys that I've brought with me. You can then play with these for five minutes. Try to remain in roughly the same place during this process. During this game, it is important for us to observe you together with your child. Under certain circumstances, I may, therefore, need to follow you with the camera and/or position it so that you and your child can still be seen in the video. Please try to ignore me as much as possible and try to act as normal as possible, even through it might be difficult. The best thing to do is imagine that I'm not even there and spend a little time together with your child playing games as you normally would.

310402	Now you can play with your child for a little while – first of all with <target child's name>'s own toys or everyday objects that he / she likes to play with. After three minutes, I'll put your things to the side and give you the toys that I've brought with me. You can then play with these for five minutes. Try to remain in roughly the same place during this process. During this game, it is important for us to observe you together with your child. Under certain circumstances, I may, therefore, need to follow you with the camera and/or position it so that you and your child can still be seen in the video. Please try to ignore me as much as possible and try to act as normal as possible, even though it might be difficult. The best thing to do is imagine that I'm not even there and spend a little time together with your child playing games as you normally would.

We would have to store your address so that we can contact you again. The German Data Protection Act requires that you give your agreement. Your address will be collected – separately from the questionnaire – for the exclusive purpose of this further survey. Naturally, all the legal data protection provisions will be complied with. We request that you continue to give this important study your invaluable support. If you would do so, we would like extend our sincere thanks to you today. Your participation is naturally voluntary.
