1 Preliminary Remarks & Reading Aid

In this codebook all 17 data files from the NEPS Scientific Use File of Starting Cohort 1 (Version 4.0.0, Onsite; doi:10.5157/NEPS:SC1:4.0.0) with a total of 3496 variables are documented. Each chapter starts with an overwiew of all variables in a file – in the order of their appearance in the file. The variable names are linked to the information on the respective variable.

This information – if available – is presented:

1. question (bold), partly with different wording alternatives with the corresponding conditions and clickable question numbers; closer definition of the question after delimiter ▹
2. variable name (as in data file)
3. variable label from data file
4. reference to the questionnaire (as described in the data manual)
5. question number in instrument after a colon
6. interview instructions inside «...»
7. table with frequencies
   a) column 1: value label
   b) column 2: value
   c) column 3: absolute frequencies (#)
   d) column 4-...: absolute frequencies by wave (if possible)
   e) missing values at the end of table and slanted

The length of the table has been technically limited; where required the number of removed lines is reported.

In order to learn more about the possible influences on the development of small children, we would like to use excerpts of data from the Institute for Employment Research (IAB) of the German Federal Employment Agency in Nuremberg when evaluating the questionnaire. For example, we are interested in data about employment, phases of unemployment, activating labor market measures taken during unemployment, and firm-related characteristics. I would like to warmly request your consent for the purpose of utilizing this data in conjunction with the data of this interview. When this information is evaluated it will be absolutely ensured that all of the data protection guidelines are strictly upheld and that the data will not be given to third parties. Your consent is of course voluntary. You can also revoke it by speaking to the contact person at infas at any time. Do you consent to the transfer of data from the Institute for Employment Research (IAB) of the German Federal Employment Agency? «The mail address and number of the contact person are included in the cover letter. Consent is of great importance for the evaluation of the study. Therefore all of the target person's questions should be answered autonomously and confidently. px04003 Introduction to the direct measures/video recordings

171 : 290102

Now I will shortly present the games to you, which we want to play with <name of target child>. To evaluate the games better afterwards, we want to record them with a camera. For a better understanding, what will be seen in such recordings, I brought a video demonstration card. 'In the left column, you can see, what we are doing; in the right column, you can see, what will be seen on the video. The games consist of two parts. In the first game 'Looking at pictures' we want to show some pictures to your child. We need a table, on which I can set up my laptop computer, and a fixed chair for you and your child. Your child will be at your lap, while his/her watches a series of stills on the laptop computer and listens to faint noises.' 'I will put a camera behind the laptop computer, which is pointed at the head of your child. You will not be seen on the recordings – just your shoulders. We are interested in the change of interest of your child in the pictures. We learn about early attention and learning itself. 'In the second game 'Playing with mother' I would like to record you and your child while you are playing together for ten minutes. I brought three bags of toys, which you can use for the playing together. These toys are suitable for infants and approved by a seal of quality, of course. They are wipeable and are completely cleaning by us after every usage. The game is about the way children play at that age with persons, they are familiar with. You may behave naturally; it does not have to look like on the photograph. Your child does not have to sit on your lap, but might sit or lie on the floor. Choose a position, which is pleasant for you and your child.' «Show the video demonstration card. If needed, please tell again that there needs to be a table high enough (75 cm +/- 10 cm) for the game 'Looking at pictures'. If there is no such table in the household, game 1 cannot be realized. If the parents want to know why there is a need for the recordings, please read out as follows: 'By the help of the recordings, we are able to assess very detailed, what are the strong interests of your child and how the child plays with persons he/she knows.' If there are questions concerning the data protection policy, please read out as follows: 'We guarantee that all your details will be treated confidentially and all legal policies of data protection will be strictly fulfilled. The recordings will be transferred by the infas to the coordinating office of the Otto-Friedrich University in Bamberg and will be collected and processed electronically. The video data will not be handed over to third parties. The video data will be deleted after the end of the study.»

p30912a Registration with a child care institution for over-threes?

171 : 100001

We are now interested in your opinion on the topic of Kindergarten. The generic term 'Kindergarten' refers not only to all types of Kindergarten, but also to day care centers and similar child care institutions for children from the age of three to six. Have you already registered <target child's name> in such a child care institution that <target child's name> is to attend at the age of three or above? «Read out options. Some of these child care institutions already accept children from the age of two; these and the following statements include such institutions. If the child already attends a child care institution: Ask if the child is already registered at this or a different child care institution from the age of three to six or if it is on a waiting list there. If the child is on a waiting list, or the respondent is unsure as to whether the child is officially registered, or on a waiting list, please check '1'. If the child is registered with one institution and on the waiting list for another, please check 1.»

p281311 Joint activities read out

162 : 080001

I would now like to find out about situations ‼in the last week‼ where you or someone else in your home had the time to exclusively interact with <target child's name>. I am now going to mention a few situations and would like you to assess how often you or someone else in your home did those things together with <target child's name> in the last week. You can choose between the following responses: several times per day, once per day, several times per week, once per week, or not at all. Read to <target child's name> or looked at picture books with <target child's name>. «Read out options if necessary. If the respondent points out of their own accord that the last week was very untypical for the child (e.g. due to the child being ill), then please read out: 'In this case, please don't refer to the last week, but to the last typical week.' 'Someone else' means all people that live in the household or regularly come to the household, such as acquaintances, relatives, or au-pairs. In addition to play together, the situations can also refer to, e.g. changing diapers, eating, or bathing. Not included are situations where something else was being done at the same time, such as house work or talking on the phone.»

I will now ask you a few questions which are very important in terms of evaluating the games we've just performed. Measured on a normal day: How long does <target child's name> sit on ‼your‼ lap? «Read out the statements. Please address this question to the person who had the child sitting on their lap during 'Looking at pictures'. If 'Playing with mother' was performed, then address this question to the mother/person who was questioned in the interview. It doesn't matter whether the child is being held or is sitting freely.»

pa04020 Respondent: Parental leave so far (yes/no)

359 : 440101

Parental leave refers to the period following the birth of the child in which mothers and fathers can choose to look after their child themselves and still maintain contact with their work. Only those mothers and fathers that were in an employment relationship at the time the child was born are entitled to take parental leave. Have you taken parental leave for <target child's name> since <0190P10/0190P8>? «If there are any questions about the employment relationship: 'Parental leave can be taken in any employment relationship, including fixed-term contracts, part-time contracts and marginal part-time employment. Apprentices, people retraining for different professions, employed people taking further professional training and people that work from home can also apply for parental leave.' The maternity protection period is not part of parental leave, but will be taken into account for the possible total duration of the parental leave. The father's parental leave can already start during the maternal protection period from the moment the child is born. During the parental leave, mothers and fathers can either be completely released from work or work a maximum of 30 hours per week. Self-employed persons and unemployed persons are not entitled to parental leave.»

p510005 Monthly household income, open

359 : 200001

In many areas, child care and vocational training for children can be costly. Now, we would like to look at all of the income from your entire household: What is the current monthly household income from all the members of the household? Please give the net amount, after deduction of all taxes and social security contributions. Please include regular payments such as pensions, rent allowance, parental and child allowance, student loans/grants, alimony payments, unemployment benefits, etc.! «If this is not known exactly, ask for a monthly estimate. Mention anonymity. If there are uncertainties about the net income: 'Please tell me the amount you receive after all taxes and social security contributions have been deducted.'»

pa04020 Respondent: Parental leave so far (yes/no)

359 : 440101

Parental leave refers to the period following the birth of the child in which mothers and fathers can choose to look after their child themselves and still maintain contact with their work. Only those mothers and fathers that were in an employment relationship at the time the child was born are entitled to take parental leave. Have you taken parental leave for <target child's name> since <0190P10/0190P8>? «If there are any questions about the employment relationship: 'Parental leave can be taken in any employment relationship, including fixed-term contracts, part-time contracts and marginal part-time employment. Apprentices, people retraining for different professions, employed people taking further professional training and people that work from home can also apply for parental leave.' The maternity protection period is not part of parental leave, but will be taken into account for the possible total duration of the parental leave. The father's parental leave can already start during the maternal protection period from the moment the child is born. During the parental leave, mothers and fathers can either be completely released from work or work a maximum of 30 hours per week. Self-employed persons and unemployed persons are not entitled to parental leave.»
