Direct measures (observations and test information)					
Test situation	Twelve-month-old children were observed/tested individually in their homes in the presence of the anchor person and the interviewer.				
Sequence of tests/observations	<p>The direct measures were administered in the following sequence:</p> <ol style="list-style-type: none"> 1. Habituation-Dishabituation-Paradigm: classification 2. Semi-standardized Parent-Child-Interaction (see Linberg, A., Mann, D., Attig, M., Vogel, F., Weinert, S., & Roßbach, H.-G. (2019). Assessment of interactions with the macro-analytic ratings system of parent-child-interactions in the NEPS at the child's age of 7, 17, and 26 months (NEPS Survey Paper No. 51). Bamberg: Leibniz-Institute for Educational Trajectories, National Educational Panel.) <p>The direct measures were recorded on video and coded afterwards.</p>				
Duration of observations/tests (excluding setup)	approx. 17,5 minutes				
Information about the administered direct measures					
Construct	Number of tasks	Duration	Mode of administration	Number of coded items	Next assessment
Habituation-Dishabituation-Paradigm: classification	1 task with 13 trials	approx. 7,5 minutes	visual stimuli presented on a laptop; coding of visual attention/fixations	132	-
Semi-standardized Parent-Child-Interaction	-	approx. 10 minutes	observed interaction behavior (standardized tasks)	18	Wave 3
