1 Overview

The documents in this collection are generated from PAPI questionnaires or programming masters (CATI). The variable names used here can also be found in the data files. These versions of the PAPI- and the CATI-questionnaire are based on the field version, augmented with the names of the variables and the numeric values. The field versions can be found in the corresponding column “Startkohorte 4: Klasse 9 (SC4), Wellen 1 und 2, Erhebungsinstrumente (Feldversion)” (only available in German). If you want to work with data, you should choose the SUF-Version at hand over the field version. This manual covers the survey year of 2010/11 and therefore features data waves 1 and 2. The material corresponds to Version 1.1.0 of the Scientific Use File (SUF) for Starting Cohort 4 (SC4) (doi:10.5157/NEPS:SC4:1.1.0).

9th Grade students in regular schools were interviewed twice: once in autumn/winter 2010/11

Figure 1: Surveys of Starting Cohort 4 in survey year 2010/11 (Wave 1 and 2)

(Wave 1) and once in spring 2011 (Wave 2). Two versions of the students' questionnaire were deployed in Wave 2. One version was for those who answered the questionnaire in Wave 1 and one for those who did not. The latter included some sociodemographic questions taken from the first-wave questionnaire.

The questionnaires for the sample of students with special educational needs (SEN) contained a subset of the questions for students in regular schools. Two versions exist for each of the questionnaires in the SEN sample with each differing only in question order.

A comparison of questions prepared for the two different samples (regular schools/SEN) in the two waves can be found in section 2.3 and section 3.3 of this manual.

As part of the first wave, information was collected on school teachers, school classes (via teachers), and on the schools themselves (via school principal). Furthermore, parents were also interviewed in Wave 1.

Figure 1 gives an overview of the questionnaires that were applied in the two survey waves.

2.3 Correspondence Between Questions (ID 37, 51, and 47)

Table 1 shows the correspondence between questions in the following questionnaires.

- ID 37: Students in regular schools, see section 2.1
- ID 51: Students with special educational needs, Version 1, see section 2.2
- ID 47: Students with special educational needs, Version 2 (rotation of ID 51)

Based on the instruments for students in regular schools (ID 37) the corresponding contents are shown for the instruments for students with special educational needs (SEN). Those questionnaires contain a subset of questions for students in regular schools. Two versions exist for each of the questionnaires in the SEN sample, differing in question order only.

3.3 Correspondence Between Questions (ID 37, 54, 57, 61, 63, 69, and 81)

Table 2 shows the correspondence between questions in the following questionnaires:

- ID 54: Students in regular schools, from panel
- ID 57: Students in regular schools, first-time interviewees, see section 3.1
- ID 61: Students with special educational needs, from panel, Version 1
- ID 63: Students with special educational needs, from panel, Version 2 (rotation of ID 61)
- ID 69: Students with special educational needs, first-time interviewees, Version 1, see section 3.2
- ID 81: Students with special educational needs, first-time interviewees, Version 2 (rotation of ID 69)

Based on the instruments for students in regular schools (ID 54 panel and ID 57 first-time interviewees) the corresponding contents are shown for the instruments for students with special educational needs (SEN). Those questionnaires contain a subset of questions for students in regular schools. Two versions exist for each of the questionnaires in the SEN sample, differing in question order only.

It is better if the teacher - and not the students - decides what needs to be done.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
My role as a teacher is to make it easier for the students to investigate and explore things.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Students will learn best when they try to find solutions to problems independently.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Classes should be based on problems with clear-cut and correct answers, as well as on concepts that are quickly understood by the students.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The amount students learn depends on their background knowledge, which is why teaching of facts is so important.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Students should be given the possibility of reflecting on solutions themselves before the teacher shows the approach to the solution.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Quiet in the classroom is absolutely necessary for effective learning.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Thinking and reasoning processes are more important than specific contents of the syllabus.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
