# 1 Preliminary Remarks & Reading Aid

In this codebook all 31 data files from the NEPS Scientific Use File of Starting Cohort SC6 (Version 5.0.0, Onsite; doi:10.5157/NEPS:SC6:5.0.0) with a total of 2551 variables are documented. Each chapter starts with an overview of all variables in a file – in the order of their appearance in the file. The variable names are linked to the information on the respective variable.

2. variable name      3. variable label      4. questionnaire      5. question number

1. question

6. interview instruction

b) values

a) value labels

d) absolute frequencies by wave

e) slanted: missing values      c) absolute frequencies

Label	Code	#	by wave	
			1	3
not specified	0	22852	13581	9271
specified	1	3	2	1
<i>Refused</i>	-97	1	1	0
<i>Don't know</i>	-98	7	2	5
<i>system missing value</i>	.	8164	4327	3837

This information – if available – is presented:

1. question (bold), partly with different wording alternatives with the corresponding conditions and clickable question numbers; closer definition of the question after delimiter ►
2. variable name (as in data file)
3. variable label from data file
4. reference to the questionnaire (as described in the data manual)
5. question number in instrument after a colon
6. interview instructions inside «...»
7. table with frequencies
  - a) column 1: value label
  - b) column 2: value
  - c) column 3: absolute frequencies (#)
  - d) column 4-...: absolute frequencies by wave (if possible)
  - e) missing values at the end of table and slanted

The length of the table has been technically limited; where required the number of removed lines is reported.

Now let's continue with the second exercise book. This exercise book is about numbers and calculus. People often deal with numbers in everyday life: for example to compare prices at the supermarket or reading statistics in journals. On the following pages, you will find different situations from everyday life on which the exercises are based. You have half an hour in total to work on all exercises. Please try to work on the exercises without interruption. I will read the instructions on page 3 to you so that you know how to work on the exercises. Please open the exercise book and read along. «Take out the calculus exercise book, write person ID on cover page. Distribute exercise book and calculator. The instructions for calculus/mathematics and reading are identical, i.e. exercise formats and contents that are only included in the reading exercise book are also explained in the calculus exercise book. [T1106=2] Convince target person of the importance to work on the next exercise book nevertheless. Use, if necessary, the argument that it is something completely different. It is not about speed anymore, and also the topic is a different one: numbers and calculus. »»

First, we would like to give you a few clues to fill out the exercise book. Please read the texts or the exercises carefully and then answer the pertaining questions. You may always look up information in the text! There are four types of questions. In the following you will see how you can answer these questions. 1. There are questions for which we give you several answer options out of which only one is correct. Please clearly tick the box next to the correct answer in case of these questions. Now please look at the respective example on page 3 (top). 2. In case of another question type, you need to decide for different statements whether each of them is true or false. Therefore, please tick in each line either «yes» (or «true» or «right») or «no» (or «false» or «not correct»). Now look at the respective example on page 3 (bottom). 3. For some questions, you should match different headlines with paragraphs or put results in the right order. Therefore, you need to put the right letters in the respective fields. Please have a look at the pertaining example on page 4 (top). 4. If there is a solution field, please insert your solution in it ! Now look at the respective example on page 4 (bottom). If you wish to correct your solution at some point, clearly paint over the wrong cross or the wrong answer. Then, thicken the correct solution anew and/or write a new result in the solution fields ! Please have a look at the respective example on page 5. Please work on the texts and questions in the order given in the exercise book. In case you are not able to answer a certain question, simply continue with the next question. If there is still time at the end, you can of course go back to the skipped questions. Some of the questions are rather easy and others rather difficult; hence, you will probably not be able to answer all questions. Please do not be confused, hardly anyone is able to answer all questions. It is important that you also try to answer difficult questions as well as possible. You may also use the calculator for the questions. Should you be ready prior to the end of the given time, you have the possibility to check your solutions once again. Then, please let me know that you have arrived at the STOP page (page 27). Do you have any further questions? ««Answer questions on instructions if needed. In case of questions on the calculator, please only show where certain keys are located, do not explain all functions. If the interviewee refuses to read the instructions carefully: try to convince the target person. Only enter the code 2 if the target person categorically insists on it in spite of all your objections.»»

Now let's talk about the second exercise book. This exercise book is about reading. In everyday life, there are many different occasions and opportunities to read, e.g. reading newspapers, journals, information brochures or websites. Everywhere people can inform themselves, learn interesting things or simply read for pleasure. On the following pages you find five different texts and questions about them. For all texts and questions, you have half an hour in total to work on them. Please try to work on the exercise book without interruption. I will read the instructions from page 3 to you so that you know how to answer the questions. Please open the exercise book and read along. «Take out reading exercise book, insert person ID on cover page. Distribute exercise book. [T1106=2] Convince the target person of the importance to work on this exercise book even if the fast reading exercise book has not been worked on. If needed, use the argument that it is something completely different: it is not about speed anymore but about comprehension of longer texts.»

First, we would like to give you a few clues to fill out the exercise book. Please read the texts or the exercises carefully and then answer the pertaining questions. You may always look up information in the text! There are four types of questions. In the following you will see how you can answer these questions. 1. There are questions for which we give you several answer options out of which only one is correct. Please clearly tick the box next to the correct answer in case of these questions. Now please look at the respective example on page 3 (top). 2. In case of another question type, you need to decide for different statements whether each of them is true or false. Therefore, please tick in each line either «yes» (or «true» or «right») or «no» (or «false» or «not correct»). Now look at the respective example on page 3 (bottom). 3. For some questions, you should match different headlines with paragraphs or put results in the right order. Therefore, you need to put the right letters in the respective fields. Please have a look at the pertaining example on page 4 (top). 4. If there is a solution field, please insert your solution in it ! Now look at the respective example on page 4 (bottom). If you wish to correct your solution at some point, clearly paint over the wrong cross or the wrong answer. Then, thick the correct solution anew and/or write a new result in the solution fields ! Please have a look at the respective example on page 5. Please work on the texts and questions in the order given in the exercise book. In case you are not able to answer a certain question, simply continue with the next question. If there is still time at the end, you can of course go back to the skipped questions. Some of the questions are rather easy and others rather difficult; hence, you will probably not be able to answer all questions. Please do not be confused, hardly anyone is able to answer all questions. It is important that you also try to answer difficult questions as well as possible. You may also use the calculator for the questions. Should you be ready prior to the end of the given time, you have the possibility to check your solutions once again. Then, please let me know that you have arrived at the STOP page (page 31). Do you have any further questions? ««Answer questions on instructions if needed. If the interviewee refuses to read the instructions: try to convince the target person. Only enter the code 2 if the target person categorically insists on it in spite of all your objections.»»

Now let's continue with the last exercise book. This exercise book is about numbers and calculus. People often deal with numbers in everyday life: for example to compare prices at the supermarket or reading statistics in journals. On the following pages, you will find different situations from everyday life on which the exercises are based. You have half an hour in total to work on all exercises. Please try to work on the exercises without interruption. Please open the exercise book on page 3. As you can see, there are again the same types of exercises that you have already worked on just before. The general instructions are the same as we have explained them before in the reading exercise book. Again, some questions will be rather difficult and others rather easy and hardly anyone will be able to answer all questions. However, it is important that you also try to answer the difficult questions as well as possible. Do you have any further questions? «Take out booklet numeracy, insert person ID on cover page. Distribute exercise book and calculator. [T1202<>2] If needed, answer questions about the instructions. In case of questions about the calculator, please only show where certain keys are located; do not explain all functions. The instructions are identical for reading and calculus, i.e. in the calculus exercise book, only exercise formats and contents that are also included in the reading exercise book are explained. Hence, the instructions do not necessarily have to be repeated for the second exercise book. [T1202=2 OR T1203=2]: convince the target person of the importance to work on this exercise book, even if the reading exercise book has not been worked with. If needed, use the argument that it is something completely different: it is not about comprehension of longer texts anymore but about numbers and calculus.»

Knowledge of scientific topics and of computer and internet applications is a particular focus of our study. We have all acquired it and also use it frequently, but to different degrees. In this context, we are particularly interested in how important this knowledge actually is for different life paths. Therefore, I would like to show you two exercise books. You are requested to use the books to complete exercises on the said topics.

More on exercise book(s)	1	17375	7296	10079
TP basically refuses to answer the exercise books	2	231	70	161

We now come to the first exercise book. This book is on science. Scientific topics often crop up in everyday life: for example in matters relating to the environment, health or technology. Some questions will be quite difficult and some quite easy and hardly anyone will be able to answer all the questions. It is important however that you try to answer even the difficult questions to the best of your ability. In order to know how to work on the exercises, open the book on page 2.

tslintro Intro fast reading exercise book

: 20181

Now let's talk about the first exercise book. As you know, sometimes we have to read very accurately and slowly, sometimes rather fast. Our first exercise book is about fast reading. If you normally wear glasses, you should also wear them now.

Label	Code	#	by wave	
			3	5
Continue with the next screen page	1	10565	7296	3269
<i>system missing value</i>	.	7041	70	6971

In this exercise book you find a series of phrases. The content of the phrases is not always correct. It is your task to indicate for each phrase whether it is correct or false by ticking boxes. You may find the phrases pretty easy, sometimes also funny. But please do not think too much about the content of the phrases. What matters during reading is rather speed and less knowledge. To explain you the task, let us look at the two examples on page 3 together. I will read the examples aloud, please read along silently. Please continue to page 3 now!

Label	Code	#	by wave	
			3	5
Continue with the next screen page	1	3269	0	3269
<i>Missing by design</i>	-54	7366	7366	0
<i>system missing value</i>	.	6971	0	6971

**Example 1:** there is no school during the Christmas vacation. You see two boxes behind the phrase. If a phrase is true, please tick the left box, if it is false, please tick the right box. Now what would you tick for this phrase? **Example 2:** cats and mice are part of the family of fish. If you have ticked the false answer once, simply paint over the wrong cross clearly and then tick the correct solution again. The ticking does not have to look very beautiful but it should be done quickly. There are many such phrases on the next two pages. Please work through the phrases as explained just before. If you are done with one page, go directly to the next page. You have two minutes in total. Please read accurately and try to work on as many phrases as possible.

Now let's talk about the second exercise book. This exercise book is about reading. In everyday life, there are many different occasions and opportunities to read, e.g. reading newspapers, journals, information brochures or websites. Everywhere people can inform themselves, learn interesting things or simply read for pleasure. On the following pages you find five different texts and questions about them. For all texts and questions, you have half an hour in total to work on them. Please try to work on the exercise book without interruption. I will read the instructions from page 2 to you so that you know how to answer the questions. Please open the exercise book and read along.

Continue with the next screen page	1	5089	1820	3269
<i>system missing value</i>	.	12517	5546	6971

First, we would like to give you a few clues to fill out the exercise book. Please read the texts or the exercises carefully and then answer the relevant questions. You may always look up information in the text! There are three types of questions. In the following you will see how you can answer these questions. 1. There are questions for which we give you several answer options out of which only one is correct. Please clearly tick the box next to the correct answer in case of these questions. Now please look at the respective example on page 2 (top). 2. In case of another question type, you need to decide for different statements whether each of them is true or false. Therefore, please tick in each line either «yes» (or «true» or «right») or «no» (or «false» or «not correct»). Now look at the respective example on page 2 (bottom). 3. For some questions, you should match different headlines with paragraphs or put results in the right order. Therefore, you need to put the right letters in the respective fields. Please have a look at the pertaining example on page 3 (top). If you wish to correct your solution at some point, clearly paint over the wrong cross or the wrong answer. Then, thicken the correct solution anew and/or write a new result in the solution fields! Please have a look at the respective example on page 3. Please work on the texts and questions in the order given in the exercise book. In case you are not able to answer a certain question, simply continue with the next question. If there is still time at the end, you can of course go back to the skipped questions. Some of the questions are rather easy and others rather difficult; hence, you will probably not be able to answer all questions. Please do not be confused, hardly anyone is able to answer all questions. It is important that you also try to answer difficult questions as well as possible. You have 28 minutes to work on the exercise book. Should you be ready prior to the end of the given time, you have the possibility to check your solutions once again. Then, please let me know that you have arrived at the STOP page (page 29). Do you have any further questions?

tx80401 Willingness: merging data from Federal Employment Agency

: 26400

In order to keep the following interview sections as short as possible, we would like to incorporate data held by the 'Institut für Arbeitsmarkt- und Berufsforschung der Bundesagentur für Arbeit' (Institute for Employment Research of the Federal Employment Agency) into the analysis of this questionnaire. This includes, for instance, information relating to previous employment relationships, phases of unemployment, participation in training measures during unemployment as well as company characteristics. I would ask you to give your official consent for the transfer and incorporation of this data into the interview data. If this information is evaluated, we guarantee that it is done so in strict compliance with all data protection regulations and that no information is passed on to third parties. Your consent is, of course, voluntary. You can withdraw this consent at any time by informing the contact person at infas. Do you consent to the transfer of data held by the 'Institut für Arbeitsmarkt- und Berufsforschung der Bundesagentur für Arbeit' (Institute for Employment Research of the Federal Employment Agency)? ««Contact person's e-mail address and telephone number are given in the letter. This consent is of great importance to the analysis of the study. Therefore, please answer any questions the subject may have in a professional, competent manner. A high degree of confidentiality with the data protection sheet is vital»»

t44606a Gender roles and traditionalism: expectations of daughter 1

:20111j

In your opinion, what kind of practical help should parents expect from their daughter once she's fully grown? Parents should expect their grown daughter to always live nearby.

t31064a Idealistic aspiration for further qualifications

: 80032

So far we have talked about courses and training programs. To learn more about your job area, it is also possible to take a further school-leaving qualification or vocational qualification, for instance the leaving certificate of the Realschule, the Abitur, vocational training, master's / foreman's examination or to pursue higher education. If you could do what you liked, regardless of your job obligations and private commitments: would you like to gain an extra school-leaving qualification so that you could learn more to do with your job?

t514001 Satisfaction with life

: 20110a

I would like to begin by asking you a few questions about your current satisfaction with different aspects of your life. Please answer on a scale of 0 to 10. '0' means that you are entirely !un!!satisfied, '10' means that you are entirely satisfied. You can grade your assessment using the numbers in between. In general, how satisfied are you currently with your life?

Label	Code	#	by wave

Since <20101P3(intmPRE / intjPRE)> have you attended a school leading to a general education qualification? By this we mean, for example, a leaving certificate of the Realschule or the Abitur. In this case we do **!!not!!** mean vocational schools which you have attended in the context of career preparations or vocational training which you have already mentioned.

th28864 Intro retirement

: 38102

The transition to retirement is also an important subject for us. Many people work up to their retirement age or beyond, others take retirement earlier, for example for health reasons. Many people take partial retirement to make a flexible transition to retirement. Let's discuss retirement first and come to partial retirement later. You told us earlier that you are retired. We would now like to ask you in greater detail if you are receiving pension payments. Are you currently getting a statutory old-age pension or state pension, a widow's pension or an incapacity pension?

t31300d General attitude towards education - school as waste  
of time

: 80054

The following statements relate to what value you personally place on education and occupation. For example, many people on principle consider a high level of education to be absolutely essential, others are less convinced. How strongly do you agree with the following statements? Staying in school for many years is a waste of time.

t31371a General attitude formal further education – necessity  
additional qualifications

: 80068

Up to now we have been discussing courses and training programs. However, in your working life you can also acquire a further educational or vocational qualification, e.g. leaving certificate of the Realschule, the Abitur, a vocational training certificate, foreman's examination or a higher education certificate. How strongly do you agree with the following statements on this subject? In your working life you should acquire extra qualifications.

ts15223 Vocational training done abroad for at least one month : 24148

**Did you complete this vocational training with at least a month abroad?**

Label	Code	#
yes	1	1116
no	2	33212
<i>Refused</i>	-97	3
<i>Don't know</i>	-98	4
<i>system missing value</i>	.	6506

Have you started (or continued) vocational training since <20101P3(intmPRE / intjPRE>, e.g. a vocational training, an educational training at a Fachschule or Berufsfachschule, a higher education program or working towards a doctorate?

Label	Code	#
yes	1	21415
no	2	11365
	3	664
<i>Refused</i>	-97	1
<i>system missing value</i>	.	7396

We are also interested in retraining measures, vocational training leading to a master's or technician's certificate, classes at an association or a chamber, such as classes at the Chamber of Industry and Commerce or vocational training in the public sector to prepare for the state examination. Since <20101P3(intmPRE/intjPRE)>, have you done such a training course or vocational training that you have not yet mentioned?

Label	Code	#
yes	1	1127
no	2	7305
